

**** Disclaimer ****

~This bot is not fully finished and is something I'm constantly working on as my knowledge and expertise increase.

~ Currently the bot/code works within specific limits/environment. (Some errors/changes within the discord website are not automatically checked.)

**** Current features within the bot ****

~ Replicates the process of creating a discord account through a specified proxy, mimicking human actions

**** Starting off ****

~ Command prefix can be changed/alterd on line 16 (Default prefix is "!", however, it can be adjusted to whatever is preferred)

~ Your "Catchall email" can be inserted on line 18. (The steps on creating a catchall can be found online through a simple search)

~ Discord token is entered on line 17 (Please go to the discord developer website, and create your bot (with the correct permissions). There you can find the discord token key)

**** Commands ****

~ {prefix} + "create": This will initiate the account gen script, which will automatically go through the steps of creating a discord account through a specified proxy, and your catchall.
